Computer Backups

Monday

Session #1 Oct 14 – Oct 21, 2019

Session #2 Dec 2 – Dec 9, 2019

The Nightmare - lost forever, all of your family pictures, your life's work, memoirs and years of research, recipes, records, and more. ALL gone. What happens when your computer "crashes," burns during a fire, is stolen or lost? This course will explain how to protect your information and share alternative ways to back up your memories, creating archives, using different media, plus the pros and cons of local versus remote ("Cloud") backup, and how to automate, schedule, and restore files.

Computers: Beginners

Monday Sep 9 – Sep 23, 2019

A bewildering world of technology: computers, laptops, smart phones, tablets, mobile computing, the cloud, software, apps, social media. This course will teach skills for using technology, including: file and folder management; how to work and navigate Windows Desktop; how to perform computer tune-ups to keep your technology running efficiently and fix minor problems; "techno-babble" and terminology; managing privacy and security; removing viruses; how to protect documents and pictures; and different methods of "backing up." Windows, Google, and Mac users welcome.

Technology Security

Oct 28 – Nov 11, 2019

Identity theft, hacking, viruses, spam, and scams. It is a dangerous world out there. This course will inform you of the risks and what you can do to protect yourself, your finances, and identity. What do you need on your computer, smart phone, or tablet to protect yourself? What are the various products and services available both free and for a fee? This course will help you understand the terms and language of technology protection and simple strategies to assure your internet, texting and/or emailing are safe. Happy computing and don't be a victim of cybercrime!

Where and How Did it Begin?

Nov 18 – Dec 9, 2019

Different perspectives on creation are based on either scientific or faith-based premises. This course surveys the basic tenets, presuppositions, evidence and/or arguments of different philosophical, religious and cultural perspectives. These include comparative analyses of Science/Darwinism, Atheism, Creationism, other Multicultural Creation Stories, and Intelligent Design. We'll also review historical developments of the so-called Science/Religion War and the debate on the relationships between the two. While not a debate class, interactive participation is welcome.
