

Deal out entire deck, face down, in a circle of 12 piles & one in the center as shown  
Turn over the top card in the center pile (4 cards in each pile)

Place card face up in the bottom of the pile corresponding to it's value  
Turn over the top card of that pile

Is card the 4th King?  
YES  
NO

Are all cards on all piles face up?  
YES  
NO

Player losses game

Player wins game

Jack = 11  
Queen = 12  
King = 13

If you want to win every time  
put a King on the bottom of the deck  
before dealing out cards!
